MHR Announces Acquisition of Trust Beneficiary Interest in Domestic Real Estate (Toranomon Hills Mori Tower: Additional Acquisition)

Mori Hills REIT Investment Corporation (hereinafter "MHR") announces that Mori Building Investment Management Co., Ltd. (hereinafter the "Asset Manager"), the asset management company for MHR, has today determined to undertake the asset acquisition described below.

1. Overview of Acquisition and Lease

| Property name | Toranomon Hills Mori Tower |
|-------------------------------|-------------------------------------|
| Asset to be acquired | Trust beneficiary interest (Note 1) |
| Anticipated acquisition price | 7,820 million yen (Note 2) |
| Appraisal value | 9,790 million yen |
| Sales agreement date | March 17, 2025 |
| Acquisition date | July 1, 2025 (anticipated) |
| Seller | Mori Building Co., Ltd. |
| Acquisition financing | Cash on hand (anticipated) |
| Lessee | Mori Building Co., Ltd. (Note 3) |

- (Note 1) MHR plans to acquire trust beneficiary interest in 87.95% co-ownership interest in compartmentalized ownership of the 28th-35th floors and co-ownership interest in the land use rights. MHR plans to acquire an additional 10% quasi co-ownership interest of the trust beneficiary interest and will hold 88% together with the 78% already acquired. The remaining 12% of the quasi co-ownership interest in the trust beneficiary interest is to be held by Mori Building Co., Ltd.
- (Note 2) The indicated anticipated acquisition price does not include acquisition-related costs, consumption taxes and other expenses. The same shall apply hereinafter.
- (Note 3) Please refer to "3. Details of the Asset to Be Acquired and Lease" for leasing terms and conditions and other details

2. Reason for the Acquisitions

MHR decided on the additional acquisition of the property (hereinafter the "Acquisition") in order to further improve profitability and stability while maintaining a focus on acquiring premium properties (Note 1) located in central Tokyo as the core of the portfolio.

The Acquisition is an additional acquisition of the quasi co-ownership interest of the trust beneficiary interest, and there are no changes in the methods, etc. of the lease with Mori Building Co., Ltd. as master lessee (fixed-rent master lease (Note 2)).

- (Note 1) "Premium properties" are defined in the management guidelines stipulated by the Asset Manager as office buildings, residential properties or retail and other facilities (retail or other use) located in the central five wards of Tokyo (Minato, Chiyoda, Chuo, Shinjuku and Shibuya) and their vicinity that are able to maintain competitive advantage in the future in terms of quality, size, specifications, etc. The same shall apply hereinafter.
- (Note 2) A master lease scheme is a scheme in which the trustee or MHR leases a property to the master lessee (sublessor), and the master lessee subleases it to an end tenant (sublessee). A fixed-rent master lease scheme is one type of master lease scheme in which the master lessee pays a fixed amount regardless of the amount paid by the end tenant to the master lessee.

Furthermore, MHR particularly valued the following points when deciding on the Acquisition.

The property is a super high-rise multi-use tower with 52 floors above ground and 5 floors below ground and standing at 247 meters in height with a standard rent floor size of approximately 1,000 tsubo located in the center of the Toranomon Hills area. It is a premium property composed of offices with high specifications, world-class conference facilities, Japan's first Andaz Tokyo hotel, residences, retail facilities, and others.

Toranomon Hills Mori Tower completed in 2014 is constructed by Mori Building Co., Ltd. being a specified constructor under the urban redevelopment project executed by the Tokyo Metropolitan Government. It utilized a breakthrough system that allowed for the construction of an architectural structure above roads and was constructed integrally with the construction of Ring Road No. 2. It is a symbolic project of urban development under public-private partnership.

The property is directly connected to Toranomon Hills Station on the Tokyo Metro Hibiya Line, and Toranomon Station on the Tokyo Metro Ginza Line is also accessible by an underground pedestrian path. With six transit stations on 11 lines nearby, the location offers favorable access to Haneda Airport, making this building an optimal global business base. Furthermore, in the surrounding area, several large-scale projects had been underway. The Toranomon Hills Station Tower was completed in July 2023, signaling the completion of such integrated urban developments, with the expectation that the area will further develop as an international business and exchange center in the future.

The property's office floors from the 6th to 35th floors are designed by placing their core functions at the center. Each standard floor provides a non-pillared space with leasable floor area (Note) of approximately 3,400 m² (approximately 1,000 tsubo) and a ceiling height (Note) of 2.8 meters, offering a highly flexible and pleasant work environment.

Furthermore, the property is capable of firmly supporting stable and continuous business activities of tenants during disasters with not only a high level of earthquake resistance employing three kinds of vibration control devices (oil dampers, brake dampers and unbonded braces), but also with a disaster prevention well, warehouse for emergency supplies and such, while electricity can be supplied from power generation facilities with a dual backup system. In addition, the property also excels in environmental performance and has acquired a rating of S (the highest rank) in the CASBEE Real Estate Certification System.

MHR has decided on the acquisition since the property is, as described above, a super high-rise multi-use tower with top-level facilities and is believed to continue possessing superior competitiveness going forward as a representative landmark of Tokyo along with advancement of redevelopment and construction of infrastructure in the vicinity.

(Note) "Standard floor leasable area" refers to leasable floor area on a standard floor (a floor with standard layout pattern) and "standard floor ceiling height" refers to the height from the floor to the ceiling in a leasing space on the standard floor. The same shall apply hereinafter.

- (Note 1) Area (land) is the area of the entire site, and area (building) is the total floor area of the entire building, as indicated in the real estate registry. The same shall apply hereinafter.
- (Note 2) As for land, land use rights for the property are established. The site area corresponding to the quasi coownership interest in the trust beneficiary interest that MHR plans to acquire equivalent to the ratio of interest in the building is approximately 433.28m² (approximately 2.5%). Also, the site area corresponding to the quasi co-ownership interest in the trust beneficiary interest that MHR plans to own equivalent to the ratio of interest in the building will be approximately 3,812.94m² (approximately 22.3%) after this acquisition.
- (Note 3) The exclusive floor area corresponding to the quasi co-ownership interest in the trust beneficiary interest that MHR plans to acquire as indicated in the real estate registry is approximately 2,442.41m² (approximately 1.4%). Also, the exclusive floor area corresponding to the quasi co-ownership interest in the trust beneficiary interest that MHR plans to own as indicated in the real estate registry will be approximately 21,493.23m² (approximately 12.2%) after this acquisition.
- (Note 4) PML means the expected maximum loss rate due to an earthquake. Although there is no uniform definition of PML, for the purposes of this document, it is equivalent to the percentage of the expected loss amount (the expected loss amount with a return period of 475 years) with a probability of 10% exceeding the expected loss amount during the assumed planned usage period (50 years = useful life for buildings in general) to the replacement price. However, the expected loss amount evaluates the direct loss due to liquefaction of the ground and earthquake vibration. This does not include secondary losses such as losses of equipment, furniture, fixtures, etc., losses due to water after an earthquake, compensation for disaster victims, or business losses due to business interruption. PML figures are reported from Sompo Risk Management Inc. as of February 14, 2025.
- (Note 5) With regard to the property, MHR will outsource building lease operations to Mori Building Co., Ltd. and shall receive a fixed amount of rent from the company, regardless of the rent amount paid by end tenants. Due to this, Mori Building Co., Ltd. is treated as the end tenant in the Acquisition.
- (Note 6) The gross rent income (annual income) represents the figure obtained by multiplying the monthly consideration for granting leasing rights described in the agreement to change the co-owned property usage agreement and property management operation agreement entirely by the 10% quasi co-ownership interest in the trust beneficiary interest rounded down below the unit and multiplying that amount by 12.
- (Note 7) Deposits/Guarantees represents the figure obtained by multiplying the amount of deposits described in the agreement to change the co-owned property usage agreement and property management operation agreement entirely by the 10% quasi co-ownership interest in the trust beneficiary interest rounded down below the unit.
- (Note 8) Total leasable floor area represents the figure obtained by multiplying the floor area deemed leasable to the lessee by the 10% quasi co-ownership interest in the trust beneficiary interest, rounded to the second decimal place.
- (Note 9) Total leased floor area represents the figure obtained by multiplying the floor area leased to the lessee by the 10% quasi co-ownership interest in the trust beneficiary interest, rounded to the second decimal place. Total leasable floor area and total leased floor area do not include storage, parking lots, mechanical rooms, etc.

4. Items Concerning Forward Commitments, etc.

The purchase agreement concerning the Acquisitions is a forward commitment, etc. (i.e. a postdated sale agreement where the execution is scheduled over one month ahead of the payment and delivery of the property, and other similar agreements), as provided in "Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc.". Under the purchase agreement, when the purpose of the purchase agreement cannot be fulfilled due to a breach of the purchase agreement by a party, the non-breaching party may cancel the purchase agreement upon notice if the delivery has not been executed.

However, under the purchase agreement, MHR's payment of the purchase price is subject to MHR completing the financial arrangements necessary to pay the purchase price. Hence, if MHR is not able to complete the financing necessary to pay the purchase price, MHR shall not be obliged to make the payment. In addition, there are no penalty provisions or payments of security deposits.

Consequently, even in cases where forward commitments are unable to be fulfilled due to failure to complete financial arrangements, the likelihood of MHR's financial conditions being significantly impacted is low.
